Supply Chain Management

Certificate Program

Certificate in Supply Chain Management (SCM) is a 15 credit certificate for professionals working or desiring to work in the supply chain management function. This is designed to serve professionals with or without formal education and/or experience in SCM. It will provide an overview of the various aspects of SCM, improve the understanding of various principles and its applications in global supply chain management. This certificate will also provide exposure to logistics, transportation, packaging, operations planning, inventory management, lean and six-sigma and enterprise resource planning (ERP) among others.
